Appl. No. 10/665,498

Atty. Docket: 3624-0127P

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A golf club head comprising:

a golf club head body including a recession in a side thereof, the recession

including a shoulder on an inner peripheral edge thereof, the shoulder further

including at least one annular groove;

at least one ring mounted in the annular groove of on the shoulder of the

golf club body head; and

a striking plate mounted in the recession of the golf club head body so that

the ring sandwiched in-between the striking plate and the shoulder of the golf

club head body, the striking plate being securely engaged with the ring, with

thereby the ring supporting a rear side of the striking plate;

wherein a gap is formed between the striking plate and the shoulder of the

golf club head body, and the gap is filled with a filling material made of a

photocuring resin.

2. (Original) The golf club head as claimed in claim 1, wherein the ring is

made of a material having a Young's modulus smaller than 3×10^7 psi.

3. (Original) The golf club head as claimed in claim 2, wherein the material

of the ring is one of titanium, brass, bronze, aluminum, magnesium, and wood.

2

Appl. No. 10/665,498

Atty. Docket: 3624-0127P

4. (Original) The golf club head as claimed in claim 1, wherein the recession

of the golf club head body further includes a flange on an outer peripheral edge

thereof, the striking plate including a stepped portion, the flange being pressed to

form a filling material for engaging with the stepped portion of the striking plate,

thereby engaging the striking plate with the golf club head body.

5. (Cancelled)

6. (Currently Amended) The golf club head as claimed in elaim 1claim 16,

wherein the annular groove includes a plurality of notches in at least one of two

opposed annularly extending corner portions thereof, the notches receiving

deformed portion of the ring during a pressing procedure, thereby reducing a

contact area between the striking plate and the shoulder of the golf club head

body.

7-9. (Cancelled)

10. (Currently Amended) The golf club head as claimed in claim-9claim 1,

wherein the photocuring resin is a resin that hardens under radiation with one of

visible lights and ultraviolet rays.

3

Appl. No. 10/665,498

Atty. Docket: 3624-0127P

11. (Original) The golf club head as claimed in claim 1, wherein the ring

includes a base portion and an annular protrusion on a side of the base, the

striking plate being mounted inside the annular protrusion and supported by the

base portion of the ring when the striking plate and the ring are engaged in the

golf club head body.

12. (Original) The golf club head as claimed in claim 1, wherein the striking

plate is made of a material having a Young's modulus smaller than 3 x 10⁷ psi.

13. (Original) The golf club head as claimed in claim 1, wherein the striking

plate is made of one of titanium alloy, stainless steel, and special steel.

14. (Original) The golf club as claimed in claim 1, wherein the golf club

head body is made of a material having a Young's modulus greater than 2 x 107

psi.

15. (Original) The golf club head as claimed in claim 1, wherein the golf

club head body is made of one of stainless steel, carbon steel, alloy steel, and Fe-

Mn-Al alloy.

16. (New) The golf club head as claimed in claim 1, wherein the shoulder of

the golf club head body includes an annular groove for securely receiving the ring.
